

MC 120

Tumbling Compound

Technical Data

GENERAL DESCRIPTION

MC 120 is a mildly acidic tumbling compound which has excellent burnishing capabilities. **MC 120** may be used in vibratory, conventional barrel, or new high speed mass finishing operations. **MC 120** can be used on brass, copper, aluminum, steel, and stainless steel.

NORMAL USE

MC 120 is used between 1% and 5% per gallon of water (1% to 2% per gallon is typical).

Flow-through operation is recommended for best results.

ADVANTAGES

1. Medium foaming compound.
2. Environmentally friendly.
3. Excellent burnishing capabilities on many different types of base metals.
4. Liquid product makes automatic feeding easier.

HANDLING AND SAFETY CONSIDERATIONS

Consult MSDS sheet on this product for handling considerations, hazard information, and first aid procedures.
